

## FH20-60HZ-400V MULTIMATIC

| Product code                      | IN7AFF350060701       |
|-----------------------------------|-----------------------|
| Reactive power Ue=400V            | 500 kvar              |
| Nominal voltage Ue                | 400V                  |
| Capacitors voltage Un             | 550 V                 |
| Capacitors max voltage Umax       | 600 V                 |
| Frequency                         | 60 Hz                 |
| THDI <sub>R</sub> %               | 100%                  |
| I <sub>250Hz</sub> %              | ≤25%                  |
| THDV <sub>R</sub> %               | ≤6%                   |
| Detuning frequency f <sub>D</sub> | 216 Hz                |
| Steps                             | 20-2x40-80-2x160 kvar |
| Electrical steps number           | 25                    |
| Banks                             | 40-60-5x80 kvar       |
| Load break switch                 | 2x630 A               |
| lcc                               | 25 kA                 |
| Controller                        | 8BGA                  |
| IP degree                         | IP4X                  |
| Dimensions WxDxH                  | 1220x670x1960mm       |
| Weight                            | 644 kg                |
|                                   |                       |

NOTE lcc value: Other values upon request.

## Standard features

| Max current overload In              | 1.3 ln                   |
|--------------------------------------|--------------------------|
| Max current overload In (capacitors) | 1,3 ln (continuous)      |
| Max overload Vn                      | 1,1xUe                   |
| Max overload Vn (capacitors)         | 3xUn (for 1 minute)      |
| Insulation voltage                   | 690V                     |
| Temperature class                    | -5/+40°C                 |
| Temperature class (capacitors)       | -25/+55°C                |
| Discharge device                     | mounted on each bank     |
| Installation                         | indoor                   |
| Service                              | continuous               |
| Internal connection                  | delta                    |
| Total losses                         | ~ 6W/kvar                |
| Inner surface finish                 | zinc passivation         |
| Standards (bank)                     | IEC 61439-1/2, IEC 61921 |
| Standards (capacitors)               | IEC 60831-1/2            |
|                                      |                          |

## Generalities

Zink-passivated metallic enclosure painted with epossidic dust paint, colour RAL 7035.

Auxiliary transformer to separate power and auxiliary circuit parts (110V).

Load-break switch with door interlock.

Contactors for capacitive loads.

FS17 450/750V self-extinguish cable according to EN 50525 - EN 50575 - EN 50575/A1.

Microprocessor Power Factor Correction relay.

Control and protection multimeter MCP5, integrated in 8BGA controller.

CRM25 single phase self-healing metallized polypropylene capacitor with Un=550V-50Hz (480-V60Hz) rated voltage.

Three phase detuning choke with tuning frequency fD=216Hz (N=3.6-p%=7.7%).
