

## FH30.S MULTIMATIC

| Product code                      | IU7JFF348050872    |
|-----------------------------------|--------------------|
| Reactive power Ue=400V            | 480 kvar           |
| Reactive power Ue=415V            | 514 kvar           |
| Nominal voltage Ue                | 400-415V           |
| Capacitors voltage Un             | 550 V              |
| Capacitors max voltage Umax       | 600 V              |
| Frequency                         | 50 Hz              |
| THDI <sub>R</sub> %               | 100%               |
| I <sub>250Hz</sub> %              | >25%               |
| THDV <sub>R</sub> %               | ≤6%                |
| Detuning frequency f <sub>D</sub> | 135 Hz             |
| Steps                             | 2x40-3x80-160 kvar |
| Electrical steps number           | 12                 |
| Banks                             | 12x40 kvar         |
| Load break switch                 | 2x630 A            |
| lcc                               | 25 kA              |
| Controller                        | 8BGA               |
| IP degree                         | IP4X               |
| Dimensions WxDxH                  | 1220x670x2360mm    |
| Weight                            | 800 kg             |
|                                   |                    |

NOTE Icc value: Other values upon request.

## Standard features

| Standard reatures                    |   |
|--------------------------------------|---|
| Max current overload In              | 1.3 ln  |
| Max current overload In (capacitors) | 1,3 In (continuous) 2 In (x380s every 60 minutes) 3 In (x150s every 60 minutes) 4 In (x70s every 60 minutes) 5 In (x45s every 60 minutes) |
| Max overload Vn                      | 1,1xUe  |
| Max overload Vn (capacitors)         | 3xUn (for 1 minute)   |
| Insulation voltage                   | 690V  |
| Temperature class                    | -5/+40°C  |
| Temperature class (capacitors)       | -25/+55°C   |
| Discharge device                     | mounted on each bank  |
| Installation                         | indoor  |
| Service                              | continuous  |
| Internal connection                  | delta   |
| Total losses                         | ~ 8W/kvar   |
| Inner surface finish                 | zinc passivation  |
| Standards (bank)                     | IEC 61439-1/2, IEC 61921  |
| Standards (capacitors)               | IEC 60831-1/2   |

## POWER FACTOR CORRECTION SOLUTIONS WITH HIGH GRADIENT METALLIZED POLYPROPYLENE CAPACITORS

## Generalities

Zink-passivated metallic enclosure painted with epossidic dust paint, colour RAL 7035.

Auxiliary transformer to separate power and auxiliary circuit parts (110V).

Load-break switch with door interlock.

Thyristor switches (SCR).

Total switching time 60 milliseconds.

FS17 450/750V self-extinguish cable according to EN 50525 - EN 50575 - EN 50575/A1.

Microprocessor Power Factor Correction relay.

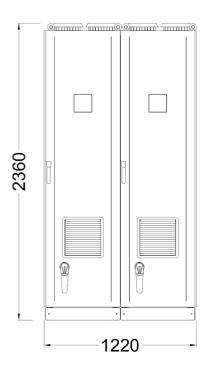

Control and protection multimeter MCP5, integrated in 8BGA controller (MULTImatic version).

CRM25 single phase self-healing metallized polypropylene capacitor with Un=550V rated voltage.

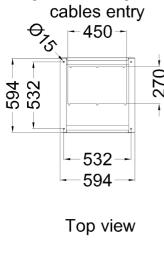

Three phase detuning choke with tuning frequency fD=135Hz (N=2.7-p%=13.7%).

Bottom view ground fixing and
